Professional experience

2021–Present (3 years) – Axxis Consulting

Position: RPA Development Team Leader

Project: Business Process Automation for Client

Activities performed:

- Technical direction and project management for RPA initiatives in UiPath: candidate evaluation, technology selection, and delivery scheduling.
- Design, development, and maintenance of automated workflows across QA and Production environments.
- Implementation of the RPA Center of Excellence: license monitoring, certificate validation, and service tracking.
- Staff training and full documentation of installation and operational procedures.
- Incident resolution, quality control, and supervision of technical deliverables.

2019–2021 (2 years) – IT Web

Position: RPA Analyst and Developer

Project: Business Process Automation for Client

Activities performed:

- Development and deployment of RPA automations using UiPath.
- Standardization of BPM processes and technical documentation.
- Functional design and analysis of business workflows for automation.
- Configuration of RPA environments (Dev, QA, Prod).
- Project administration and technical training for client teams.

2015–2019 (4 years) – T-Systems México

Position: .NET Consultant, **Project:** SSO3-SSO4 Service Management

Activities performed:

- Administration and maintenance of applications on IIS, Unix, and Windows Server.
- Development of internal tools using C#, SQL Server, and Bash scripting.
- Automation of operational processes and data management.
- Creation of environments and operational manuals for technical support.
- Specialized support for enterprise service infrastructure.

2012–2015 (3 years) – Optimus Sistemas Holísticos

Position: .NET Developer, **Projects:** Smart Adviser (2012–2014) & AIPP (2014–2015)

Activities performed:

- Development of services and APIs with C#, ASP.NET, WCF, and Web Services.
- Creation of dashboards and business rules using BizTalk, Telerik, and HTML5.
- SQL Server database administration and Excel macro maintenance.
- Implementation of over 350 automated business rules.
- Design of interactive interfaces and front-end performance optimization.
